

Of Flemish origin, I travel according to my experiences especially between Belgium and Brittany where I work on the creation of my work in my own workshop.

I am attracted by ancient cultures, mythology, sources of the simple life and rituals, I discover day after day, more and more detached from the worries of everyday life.

I constantly refresh my ideas through different experiences that life offers me.

I am dedicated to an art which is often defined as “Zen” to convey my inspiration, never despaired, regarding Human.

I work mostly clay, wood, stone, iron and bronze, and I mix different techniques, depending on the inspiration of the moment, while incorporating elements of Nature, a major source in my creations.
